LEED v4

As a three-generation old, family run business that is the parent company of seven fabrication facilities and one epoxy coating plant, Re-Steel takes its commitment to the environment very seriously – for our customers, employees and future generations of our business. Re-Steel is an active CRSI member and supporter of the efforts of the U.S. Green Building Council and their Leadership in Energy and Environmental Design (LEED) initiative. We are committed to transparent reporting of our environmental impacts and fabricating products that are sustainable. All Re-Steel uncoated fabricated rebar is from, on average, 98.0% recycled scrap steel (EAF production route) sourced within the United States. Additionally, Re-Steel fabrication scrap is 100% recycled to steel mills. Re-Steel's products are a major contributor to "Green Construction" and are a positive contributor per the LEED rating system.

Re-Steel has completed a manufacturer specific ASTM Certified EPD and is able to supply your project with fabricated rebar that is capable of contributing maximum LEED credit under LEED v4.

PRODUCTS / SERVICES

Reinforcing Bars

Re-Steel stocks and supplies a full inventory of #3 through #18 rebar in a variety of lengths, grades, and chemistries that can be used in a variety of applications.

Coated Bars/ Specialty Bars

Re-Steel offers coated and specialty bars for all projects including:

Epoxy Coating – Re-Steel has a large inventory of Epoxy Rebar and our own Epoxy Coating plant, Corrosion Control, Inc.

Galvanizing – Re-Steel has strong relationships with our Galvanizers to ensure expedited service to all projects.

Stainless Steel – Re-Steel Supply Co, Inc. West Virginia houses our dedicated stainless shop that stocks a variety of stainless alloys.

MMFX (ChromX) – Re-Steel Stocks a full line of MMFX ChromX 4100 and 9100.

Fiberglass (FRP) – Fiberglass Reinforcing is available upon request for special applications.

All-Thread Bar –

All-Thread Bar is available in sizes #8 through #24 with couplers and hex nuts as needed.

End Treatments

Re-Steel offers many different end treatments which are done in-house including:

- Threaded Couplers
- Straight or Tapered Threads
- Threads to Fit Inserts or Nuts
- Threaded Terminators

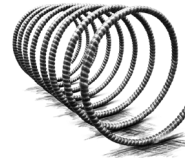

-HRC 555 & 670 T-heads

-Bolt-On Couplers/
Terminators (Field Install)

Continuous Spirals

Re-Steel can supply continuous spiral reinforcing on our in-house spiral machine in several diameters and sizes from #3 through #6. Coated spirals are also available.

Wire Mesh/ Accessories

Re-Steel stocks all standard gauges of wire mesh. Epoxy and Galvanized mesh as well as specialty sizes and gauges are also available upon request.

Re-Steel also carries a full line of bar supports and spacers in various finishes and sizes.

Fabrication

Re-Steel's facilities are equipped with shear lines, benders, automatic stirrup machines, radius benders, threaders, cranes, and straighten-and-cut machines.

Pre-Assembly

Re-Steel offers pre-assembly on a variety of different reinforcing components including caissons/ drilled shaft cages, pile cages, shear wall/column cages, small footings and many others.

Delivery

To ensure that our products are delivered to you safely, efficiently, and on time, we have over 150 trailers and an excellent driving and production team.

Estimating & Detailing

Re-Steel offers full service, in-house, estimating, detailing and project management. Our resources allow us to work with customers from a project's conception to its completion.

Wholesale/ Distribution

Re-Steel utilizes our dedicated Distribution Sales office to offer wholesale pricing on full truckloads of our rebar products including specialty bars and wire mesh.
